

REINZOSIL

Extremely high stability at high temperatures

Solvent-free, permanently elastic, fast-curing silicon sealant for sealing flat surfaces where there is a sealing gap ≥ 0.15 mm / ≥ 0.006 in (can also be applied to assembled components).

- Easy to position and shape and easy to apply
- Precise positioning, down to the last millimetre
- Protective cap prevents nozzle from blocking up
- Prevents corrosion of the sealing surfaces
- Non hazardous

1 FOR ALL

- Acid-free curing means no damage to synthetic parts, electrical components, etc.
- Cures faster than other silicon sealants
- Low odour
- Can be used on vertical and overhead surfaces
- Substitutes all conventional silicones

Technical Data	REINZOSIL
