## Propshaft Quality Tubing

Since we launched our tubing supply, we have analyzed the performance so far. In order to improve the accuracy of invoicing the standard bar length has been changed from 6 meters to be 5.8 meters as all tubing is now be priced per meter, sold and shipped in multiples of full bar lengths (@ 5.8 meters\*) the unit price you pay remains the same.

A cutting service is available for a small charge if required.\*\*

All tubing (subject to availability) will normally be available for shipment 2 to 3 weeks after receipt of order, tubing will be dispatched from our Győr distribution center so can be consolidated with any other materials being shipped at the same time, thus avoiding additional transportation charges wherever possible.

Please talk to your account manager for further information and pricing.

\*Standard bar lengths may vary  $\pm$  10% will be charged as 5.8 x 1 meter

\*\*A bar length may be cut only 1 or 2 times so we can ship in approximately 2 meter or 3 meter lengths, all tube still have to be ordered in multiples of 5.8 meters
