## Dana Releases Two New Driveshafts for Volkswagen Amarok Drivers

Dana has unleashed two new powerful driveshafts for the Volkswagen Amarok as part of its Dana Aftermarket Performance Program, which focuses on the needs of performance racing and off-roading applications. Covering nearly one million vehicles in operation, these driveshafts are made to equip Amaroks on the road today dating back to model year 2013.

Designed to provide high performance under the toughest conditions, Dana's robust driveshafts offer 0.5 mm thicker tubing compared to the originals granting higher torque and impact resistance. Not only is the tubing thicker, but the paint is double the thickness, protecting the driveshaft from corrosion and increasing its tolerance against harsh conditions, such as saltwater. Because equipped with Spicer Life Series<sup>®</sup> u-joints, the life of the driveshaft increases by approximately 50 percent over the truck's original part.

Both driveshafts have been added to the list of part numbers available via the Spicer Catalog and additional information can be found on [DanaAftermarket.com](http://DanaAftermarket.com). To learn more about the Dana Aftermarket Performance Program visit [DanaUnleashed.com](http://DanaUnleashed.com).
