New Pricing for Scania U-Joints

Dana has once again enhanced its line of u-joints, this time for Scania truck owners. To best meet customer needs, Dana has put measures in place to improve its robust, heavy duty u-joints, which are designed, engineered, and manufactured to the highest performance and quality standards. To do so, Dana shifted the bearing cup assembly to be based on its state-of-the-art Spicer® Compact™ Series Plus. Additionally, production is now taking place in Germany to utilize increased mass production capabilities.

“At Dana, we put a sharp focus on listening to our customers and value their feedback,” said Leonardo Tummillo, Dana Aftermarket Group. “We are pleased to deliver u-joints capable of increased performance, reliability and durability that our customers expect from Spicer products, while also saving customers money by decreasing our prices.”

Dana has a proud history of serving heavy-duty commercial vehicles as an original equipment manufacturer and has continued to apply that expertise to the aftermarket. Beyond u-joints, truck owners can find Spicer original driveshaft components to serve virtually every truck model currently in production.

For more information about Dana’s Spicer u-joints for Scania models, visit www.DanaAftermarket.com. The u-joints can also be ordered through Dana’s Aftermarket Distribution Center in Győr, Hungary.
