## Dana Re-Enters Production of Center Bearings for Medium-Duty Commercial Vehicles

Dana has relaunched production of its Spicer® Center Bearing B-10013-00 series with applications in many trucks by popular commercial vehicle manufacturers, including IVECO S.p.A and MAN Truck & Bus AG. Although series production of the products was paused, the company decided to reactivate production of the center bearing and related mid-ship assemblies based on the continued demand for these high-quality products in the aftermarket.

“We manufacture all of our products according to the strictest OE series production standards, and our aftermarket customers recognize that we make the best parts in the market,” said Guido Reiter, driveshaft product manager, Dana Incorporated Aftermarket Group. “Especially for these specialty truck assemblies, Dana is the only producer capable of making these center bearings to that quality. We look forward to once again producing them for the aftermarket.”

To ensure the parts meet the high OE standards, Dana is producing the Spicer Center Bearing B-10013-00 series in Germany. The company is bringing back the original product numbers to assist customers in finding the right one to meet their needs. Attached is a table featuring the part numbers and cross reference numbers with the commercial vehicles they fit.
