Dana Brings its Reliable Spicer[®] Compact[™] Series Plus Driveshafts to the Aftermarket

Leveraging its extensive expertise in driveshaft design, Dana introduces its Spicer[®] Compact[™] Series Plus driveshafts to the aftermarket worldwide. Spicer Compact Series Plus driveshafts are the world's lightest steel driveshafts in their class, helping original-equipment manufacturers meet efficiency standards. Weighing up to 10 percent less than competitive products and designed for trucks and buses ranging from 8 to 60 tons, these driveshafts enhance overall performance through improved sealing, extended product life, and increased durability.

The Spicer Compact Series Plus driveshaft is available on a variety of vehicles, including every new truck from MAN Truck & Bus, IVECO, Volvo Trucks, and Renault Trucks. To introduce this new series to customers, Dana is hosting an online Webex to take a deeper look at the technology. An online training will be soon hosted: a separate invitation will follow.

About Dana Incorporated

Dana is a world leader in providing power-conveyance and energy-management solutions for vehicles and machinery. The company's portfolio improves the efficiency, performance, and sustainability of light vehicles, commercial vehicles, and off-highway equipment. From axles, driveshafts, and transmissions to electrodynamic, thermal, sealing, and digital solutions, the company enables the propulsion of conventional, hybrid, and electric-powered vehicles by supplying nearly every vehicle and engine manufacturer in the world. Founded in 1904, Dana employs more than 36,000 people who are committed to delivering long-term value to customers. Based in Maumee, Ohio, USA, and with locations in 33 countries across six continents, the company reported sales of \$8.1 billion in 2018. Having established a dynamic, high-performance culture, the company has been recognized globally as a top employer, with significant honors in Asia, India, Italy, Mexico, and the United States.
