

COMPLETE UNIT'S STOCKING PROGRAM

Based on the continuous need to improve performance and deliveries to our customers, we are pleased to announce that we are now stocking complete axles and transmissions in both our Crossville and Gyor DC's.

Please find the current list of part numbers and quantities to be stocked at each location in the page attached to this bulletin.

The units will continue to remain as "Quote on Request" and inquiries should continue to go through customer service or your account manager for price and delivery confirmation.

We will be reviewing and adding new part numbers to our stock program regularly to increase sales opportunities and to adjust to market requirements quickly thus reducing the leadtime.

Additions or changes to the program will be communicated on a regular basis.

Thank you for your business and for supporting Dana products.
